Professional Summary

Full Stack Developer with 3+ years of experience building scalable, high-performance web applications using React.js, Node.js, Express.js, and MongoDB. Proven track record in designing REST APIs, GraphQL services, secure authentication systems, AI-powered tools, and enterprise e-commerce platforms (Shopify and BigCommerce). Passionate about clean modular backend architecture, strict separation of concerns, and responsive user experiences.

Technical Skills

Languages: JavaScript, HTML5, CSS3, Dart, Liquid

Frontend: React.js, React Router, Flutter

Backend: Node.js, Express.js, Sails.js

Database: MongoDB

API: REST API, GraphQL

Authentication: JWT, RBAC, HTTP-only Cookies

Cloud & Tools: Git, GitHub, Postman, Webhooks, Google Cloud Scheduler

AI: Google Gemini API (Multimodal)

E-Commerce: Shopify, BigCommerce

Work Experience

Full Stack Developer

Dec 2022 – Present

Acumen Technologies Group Inc

- Architected and maintained scalable e-commerce applications using React.js and Node.js, leveraging modular code design to improve code reusability.
- Designed and optimized high-performance RESTful APIs and GraphQL services for data-intensive applications, significantly improving data retrieval efficiency.
- Engineered secure webhook-based systems for real-time payment processing, seamlessly integrating PayPal subscription workflows for recurring revenue models.
- Developed a robust authentication ecosystem featuring JWT, granular role-based access control (RBAC), and a secure refresh token strategy utilizing HTTP-only cookies.
- Automated complex product workflows including creation, media uploads, and dynamic metafield management reducing manual operations.
- Customized Shopify shipping logic and checkout workflows dynamically to accommodate complex, specialized business requirements.
- Generated automated, data-driven CSV/JSON reports for business analytics using scheduled backend jobs via Google Cloud Scheduler.

Mobile Application Developer

Aug 2022 – Dec 2022

Acumen Technologies Group Inc

- Developed and deployed cross-platform mobile applications using Flutter, ensuring consistent UI/UX across devices.

- Integrated complex external APIs and implemented efficient local storage solutions to optimize mobile app runtime performance.
- Collaborated closely with cross-functional backend teams to ensure seamless data flow and reliable API integration.

Projects

MERN Ecommerce Platform

[Live Demo](#) [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Razorpay, REST API

- Developed a full-stack e-commerce application featuring a highly responsive user experience and dynamic state management.
- Implemented secure JWT user authentication alongside comprehensive Role-Based Access Control (RBAC).
- Built end-to-end features including a searchable product catalog, persistent shopping cart, checkout flow, and an intuitive admin dashboard.
- Integrated the Razorpay payment gateway securely to handle real-time transaction workflows.

AI Image SEO Generator

[Live Demo](#) [GitHub](#)

Tech Stack: Node.js, Express.js, Google Gemini API, Multer, REST API

- Built an AI-powered web application that analyzes uploaded images and dynamically generates SEO-optimized metadata (titles, descriptions, tags, and categories).
- Integrated Google Gemini multimodal AI to handle advanced visual analysis and return structured, actionable data.
- Implemented memory-efficient image uploading utilizing Multer with in-memory buffer processing.
- Designed a highly scalable backend architecture utilizing a strict separation of concerns across routes, controllers, and services.

JWT Authentication API

[GitHub](#)

Tech Stack: Node.js, Express.js, MongoDB, JWT, bcrypt, HTTP-only Cookies

- Developed a standalone production-ready authentication API implementing industry-standard security practices.
- Hardened data protection by applying bcrypt hashing for user password storage and implementing refresh token mechanisms via secure HTTP-only cookies.
- Created custom middleware handlers to secure protected API routes and validate user permissions.

Education

B.E. Electronics and Communication Engineering

2018 – 2022

University V.O.C College of Engineering

CGPA: 7.22/10
